MORALE OF CREWS:

Crews are working safely, spirits and moral are still high!

INJURIES:

NONE -

MESSAGE: THERE IS NO OR SPORATIC CELL OR INTERNET SERVICE AT THIS TIME.

There are numerous un-staff fires in the geographic area due to a shortage of resources.

The major fuel type found on the fires are timber with dead and down component (grand fir, lodge pole, ponderosa pine and sub-alpine fir/white pine). There are also areas with slash from logging operations as well as young stands of timber and old fire scars. Fire Behavior Prediction System Fuel models 5, 8, 10, and 11. Predicted: 1 hr fuel 6% unshaded 9% shaded Predicted: 10 hr fuel 8%, 100 hr fuel 10%, 1000 hr fuel 9-12%

Cooler air will move into the fire area today. Winds will be mainly out of the northwest on the north end of the complex's, and more out of the west in the south end. Scattered showers will move through the area today. The air mass will trend toward slightly warmer and drier Monday and Tuesday but not like what we had last week. Another round of cooler air is expected around Wednesday.

The module last day of work for the module is 9/4. Travel to Lewiston to catch NICC jet 9/5.

Elk Season Opens Monday!
